DETAILED ACTION

1. This action is in response to applicant's response filed on July 7,, 2008. **Claims 1-2, 4-5, 7-10, 12-24, 26 and 28-32** are pending in the present application.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites a system and limitations for the following: : "comprising a biquad filter that comprises a first amplifier and a second amplifier connected in series, the first amplifier having at least one feedback path that comprises at least one first variable passive component and at least one feedforward path coupled between the first amplifier and the second amplifier that comprises at least one second variable passive component; and a control system configured to selectively adjust the at least one first variable passive tunable component and the at least one second variable passive component of the tunable filter to set at least one pole and at least one zero of a transfer function of the tunable filter so that the transfer function of the tunable filter ~~corresponds to~~ approximates loop characteristics of the associated communications network".

The specification supports the amendment [Figs. 2-3; page 16-31; page 4, lines 1-14]. The prior art does not teach these limitations. Therefore, claim 1 is indicated allowable.

Claim 12 recites a system and limitations for the following: "means for separating transmit and receive signals at an interface between a central office and a subscriber loop; means for decoding a control signal provided by a control system to generate an output signal having one of a plurality of states, each of the plurality of states corresponding to loop impedance and line coupling characteristics for a respective associated communications network; and means for selectively tuning the separating means based on the one of the plurality of states of the output signal".

In this context, the applicant's arguments are persuasive. Further, the prior art does not teach these limitations. Therefore, claim 12 is indicated allowable. Claims 16 and 32 are essentially similar to claim 12 and are indicated allowable.

New search updates reveal no other prior art which teaches the limitations in the context of the claims.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to RAMNANDAN SINGH whose telephone number is (571)272-7529. The examiner can normally be reached on M-TH (8:00-5:30).
